[H-10] Improper handling of fee-on-transfer tokens

Description

The deposit path in contracts/Pool.sol:88 trusts the transfer amount parameter without re-checking the recipient balance.

Recommendation

Compute the delta of recipient balance before vs after transfer.

Resolution: Fixed in PR #555

[H-11] Insufficient slippage check on swap path

Description

The swap in contracts/Pool.sol:140 uses a hard-coded 100 bps slippage.

Recommendation

Accept user-supplied minOut and revert if final output is lower.

Resolution: Acknowledged
