Findings

[M-01] First compact medium finding

The setter in target/contracts/CompactTwo.sol:L20 is missing a zero address guard which can lock the contract permanently if invoked by an automated migration tool.

It is recommended to add a `require(newOwner != address(0))` at the top of the setter.

[L-01] Trailing low finding

The event emitted in target/contracts/CompactTwo.sol:L60 packs three indexed parameters where two would suffice for analytics indexing. Consider dropping the third indexed parameter to save gas.
