Security Review: Sample AMM

[C-1] Missing access control on admin setter

Description

The setFeeRecipient function in target/contracts/AMM.sol:L88 has no onlyOwner guard. Any caller can redirect the protocol fee stream to an attacker-controlled address.

Proof of Concept

Mallory calls AMM.setFeeRecipient(mallory) at target/contracts/AMM.sol:L88. All subsequent protocol fees route to Mallory's address. No revert.

Recommendation

Add an onlyOwner modifier to setFeeRecipient. Confirm via tests.
