

Sherlock Audit Report
Project: Sample AMM

C-1: Missing access control on admin setter

Source: <https://github.com/sample/amm/blob/main/contracts/AMM.sol#L88>

Severity: Critical

Summary: The setFeeRecipient function in target/contracts/AMM.sol:L88 has no onlyOwner guard. Any caller can redirect the protocol fee stream to an attacker-controlled address.

Recommendation: Add an onlyOwner modifier to setFeeRecipient. Confirm via tests covering the privileged-caller and non-privileged-caller paths.

Resolution: Fixed in PR #42; commit cafe1234.
