

Spearbit Sample Audit Report
Client: Sample Margin

5.1.1 Liquidation incentive lets attacker self-liquidate at profit

Severity: High Risk - exploitable in current parameter set

Context

liquidate in contracts/Margin.sol:155 grants a 10% incentive without checking the liquidator equals the position owner.

Impact

Self-liquidation arbitrage drains the insurance fund.

Recommendation

Reject self-liquidations.

Resolution

Acknowledged - patch tracked in PR #42.
